

Hurray, Bravo, Way to Go, Cool, Splendid, Excellent, Outstanding, Superb, First-Rate!!

Below are tables that show the percentage of students who were proficient or near proficient on the South Dakota State Assessment. These tests were taken last spring and were the first time the common core standards were assessed and also the first time the assessment was NOT paper and pencil.

As you can see, SJS students did an excellent job compared to students throughout the state. While being trained to give this assessment we were told to only expect 30% of the children to score proficient.

Thank you Lord!
